Pocket Query erstellen

My Pocket Queries

Pocket Queries are custom geocache queries you can have emailed to you on a daily or weekly basis. They are in a format you can bring along with you on cache hunts on your GPS and/or PDA. You can select a GPX or LOC text file that works with [supported software applications](#). Because of the detailed queries, each search can run only once per day. You have up to 5 pocket queries run every 24 hour period.

Using this service you agree to the terms of [this license agreement](#).

 [Create a new query](#)

 [Find Caches Along a Route](#)
